

To protect your hard wax oiled wood floor and prevent aging Tarkett recommends that you use care and maintenance products from OSMO.

Cleaning

- Remove loose dirt with vacuum cleaner or a dry micro fiber mop.
- For more thoroughly and gentle cleaning use OSMO "Wash and Care" (8016) mixed with water.
- Do not allow spillage of wine, coffee, paint etc. to stay on the floor, wipe up spillage at once.

Reconditioning

- Clean the floor as described above.
- Apply a thin layer of OSMO "Liquid Wax Cleaner" which leaves a long lasting protection with excellent stain repellence. (Transparent 3029 and white 3087.)
- OSMO "Licquid Wax Cleaner" has also an excelent cleaning performance. See chart below for advise.

New Treatment

- When spot repairing or re-oiling is needed, use OSMO "Polyx®-oil" (3062).

Read instructions from OSMO carefully before using.

Stop the dirt at the entrance

Stop the dirt at the entrance with an effective mat system. The more dirt you stop at the door, the less cleaning inside the room. Remember that grit can scratch and damage floors.

Indoor climate

The correct indoor climate and air humidity are important, otherwise wood floors can change

shape more than usual. You should pay particular attention to this in new buildings. Moisture in the building construction and normal summer humidity demand good ventilation, and possibly heating. The relative air humidity indoors should be 30-60% RH. During the heating season it can become too dry (less than 30% RH) sometimes. In that case we recommend to use an air humidifier.

CAUTION!

There is a risk of spontaneous combustion when oil products are in contact with textiles. Oily cloths must immediately be put into water or burned. In case of contact with eyes, rinse immediately with water. Keep away from children.

General advice

Osmo products for care and maintenance of hard waxed oiled floors make maintenance easier and further extend the already long life of wood floors. Please note that different wood species have different qualities such as hardness, sensitivity to indentation and scratching, colour, etc. All wood floors change colour slowly when exposed to light.

Removing stains

Tarkett hardwaxed oiled wood floors are very resistant to stains. Then general rule is to remove stains as quickly as possible, before they dry and set. Afterwards, wipe clean with a well wrung-out cloth. Consult the stain guide for the type of cleaner you should use.

STAIN	REMOVED BY
Fruit, berries, juice, soft drinks, beer, wine, milk, cream, coffee, tea	Osmo Wash and Care
Chocolate, grease, whipped cream, rubber marks, oil, tar, asphalt	Osmo Liquid Wax Cleaner / Spray
Ink, felt tip pens, stencils, blacking, paint, crayons, etc	Osmo Liquid Wax Cleaner / Spray
Urine, vomiting	Osmo Wash and Care
Blood	Cold water
